

TechHer Forward

FOR FUNDERS & PARTNERS

From User to Founder.

AI literacy and founder empowerment for women left out of every tech wave before this one.

MISSION · 1,000 women empowered and founder-capable by 2030.

THE GAP

Women — particularly from underrepresented communities — remain systematically excluded from AI and technology economies. TechHer Forward addresses this gap through structured, community-delivered programming.

THE MODEL

Hybrid delivery. Community partner networks. Curriculum covering AI literacy, practical building skills, data ownership, and founder development. Designed for accessibility — no prior tech background required.

THE OUTCOMES

Participants leave with AI skills, a founder mindset, and the tools to generate income from their ideas. Target: 20% of graduates generating income within 12 months of program completion.
